- Self-service sign-up and payment through their PayDashboard account

- Send messages, documents, or messages and documents in one transfer

- Access reporting on open/read rates for individual messages/documents and across their account*

PRICING

There are two plans available to suit your clients' needs:

BASIC

Send messages and/or document to individuals, groups or the entire workforce.

Schedule documents and messages for publication.

Send email notifications to employees.

👑 PLUS

All the features of Basic, plus:

Message-level reporting on which documents and messages have been read.

Account-level reporting on engagement across all communications.

To learn more about adding this module as an inclusive service for all clients, please get in touch.

The leading cloud-based payslip provider

PayDashboard is a digital payslip portal that integrates with your existing payroll software to deliver online payslips, PAYE forms and payroll data.

Unlike other epayslip portals, PayDashboard has been designed with the challenges of a payroll bureau in mind. From product features such as simultaneous upload of payroll data and bulk scheduling of payslips, to the fact that we don't charge you for re-publishing payslips with corrections or restrict the number of admin users that your clients can set up on PayDashboard... we are here to support you to deliver the best payroll service to your clients.

Reduce client queries. Build your business. Streamline your service.
