THE SITUATION

PayDashboard – the leading interactive and immersive cloud-based payslip platform and Moneysoft – the comprehensive payroll software integrate seamlessly to deliver an enhanced client and employee payroll experience.

This case study provides feedback from several PayDashboard clients who currently utilise Moneysoft as their payroll software together with PayDashboard as their payslip delivery platform.

“The combination of Moneysoft and PayDashboard gives me a tool fit for the 21st Century. My clients thank me and my clients’ employees thank me too”.

Adam Shaw, A Shaw & Co Accountants

“We started using PayDashboard as a way of meeting our GDPR obligations when sending out payroll documents. It is incredibly simple to export documents from Moneysoft and upload into PayDashboard in a secure manner, which is more efficient than sending out password-protected documents. PayDashboard has been incredibly well-received by our clients, with 100% positive feedback and has helped to engage both clients and their employees in the payroll process”.

THE FEEDBACK

PayDashboard and Moneysoft users want to remain GDPR compliant and provide a sleek and professional payroll service.

“Sempar have been using PayDashboard from the beginning. We use it in conjunction with Moneysoft and really love the system. We had it when we were still small and have grown with PayDashboard. It still works for us now as well as it did when we had fewer clients. PayDashboard really helps us with communicating to our clients through a secure and GDPR-compliant platform”.

James Finucane, Sempar

THE FEEDBACK

“It is time saving in that employees can access their payslips and P60s and I am not being bothered for forgotten passwords or lost or historical payslips. The upload takes the same amount of time as emailing out payslips and there is not that fear of hitting the wrong “send” button. It is great value for money due to the peace of mind it provides and the ease of use.”

Liz Jones – Partner, Turner & Partners

“The system has given a polished “front” to the payroll service that I offer and I am happy to recommend this to others”.

Karen Marr, Teckform
